

Centri

Transforming data into decisions

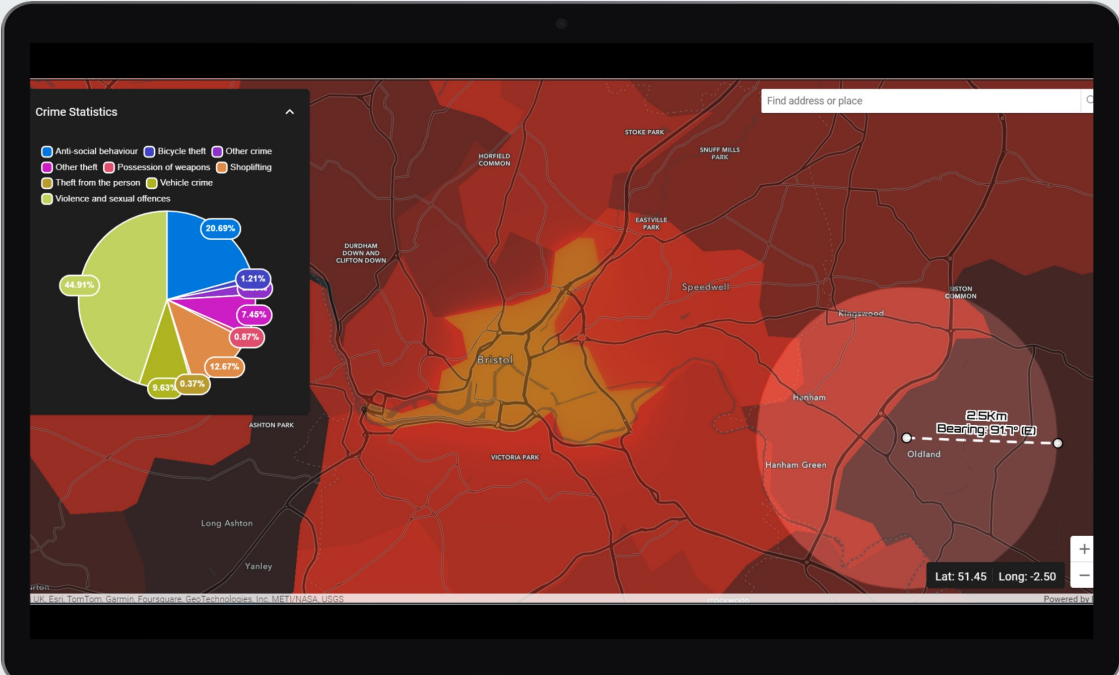

Centri is the innovative suite of Centralised Intelligence products from Roke Intelligence, providing data-driven situational awareness through geospatial platforms and data services.

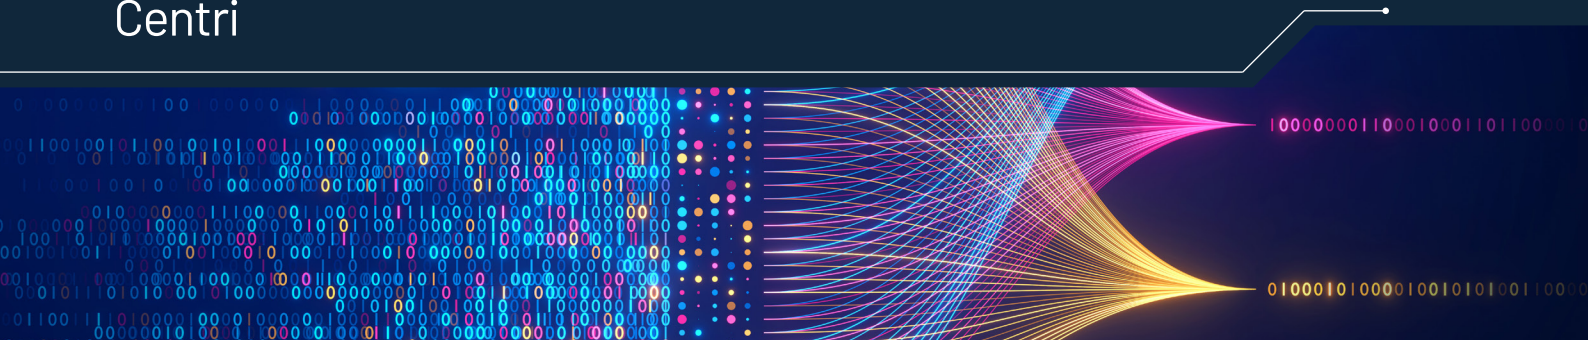

Data-to-intelligence solutions

The landscape of global threats and media scenarios are in a constant state of flux, and geospatial visualisation of data is essential for decision-makers to have the latest and most accurate insights to make informed decisions in today's dynamic world.

Centri solutions fuse and layer georeferenced datasets to reveal relationships and patterns that are often hidden in the complexity of large volumes of data enabling users to draw insights from near real-time data and elevate decision-making from best guess to data-backed precision.

By seamlessly combining automated data-feeds within custom user-interfaces Centri provides organisations with a single source of truth and democratises access to geospatial intelligence across organisations. Trust Centri, the data-to-intelligence solution driving excellence and innovation at your organisation.

Features & Benefits

Centralised Intelligence

Centri centralises all your information streams into an intuitive interface. A unified approach eliminates the clutter of disparate tools, offering a streamlined solution that grants immediate access to real-time, actionable intelligence.

Strategic Alignment

By aligning with and focusing on your organisation's overarching goals Centri platforms amplify the impact of geospatial data. Strategic alignment bridges gaps and enables collaboration throughout your organisation, democratising access to insights transforming data into growth.

Actionable Insights

By seamlessly layering client data with automated data feeds within customisable user interfaces, Centri enables real-time situational awareness and incisive analysis.

Open-Source Data

Centri harnesses data from diverse sources across the open-source domain, such as news, incident reports, weather forecasts, public health statistics, and asset locations, to enable decision-makers to make more efficient and well-informed decisions.

Revealing Hidden Patterns

Centri combines and layers spatially referenced datasets to reveal the concealed relationships and patterns within complex datasets that would normally evade conventional analysis.

Empowering Anyone, Anywhere on Any Device

Centri solutions are by design flexible, offering user-friendly interfaces designed to accommodate both novice and expert users operating on desktop and mobile devices.

Roke are Changing Worlds

Roke is a leading UK innovator in science and engineering. For over 60 years we've been improving the world through innovation, combining the physical and digital. We conceive, design and secure technically advanced data and communication systems for governments and industry.

Our deep knowledge of sensors, communications, cyber and AI means our 600+ engineers are uniquely placed to combine and apply these technologies to solve real world technical challenges and help deliver critical missions for our customers.

As a trusted partner, we welcome any problem, and are confident that our consulting, research, innovation and product development will keep people safe.
